OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization for programming languages and databases trends
 - Dashboard for current and future trends
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- This report provides a data-driven perspective on the emerging and future technology skills landscape, aimed at top managements in strategic workforce planning and capability development.
- To stay competitive in the rapidly evolving technology landscape, this analysis identifies the trends of emerging and future technology.
- Primary data source for this study is the Stack Overflow Developer Survey, complemented by information from job postings and training portals.
- Performed structured data wrangling process.
- JavaScript, Python, and PostgreSQL are the core technologies shaping the current and future landscape.

INTRODUCTION

- To identify emerging and future skills requirement.
- Target Audience: Executive Leadership, HR strategists, Technology Consultants and Business Development Teams.
- Value: Provides data driven perspective on evolving technology landscape.
- Purpose:
 - Identifying trends of technology preferences
 - Compensation trends
 - Job satisfaction factors
 - Workforce Demographics

METHODOLOGY

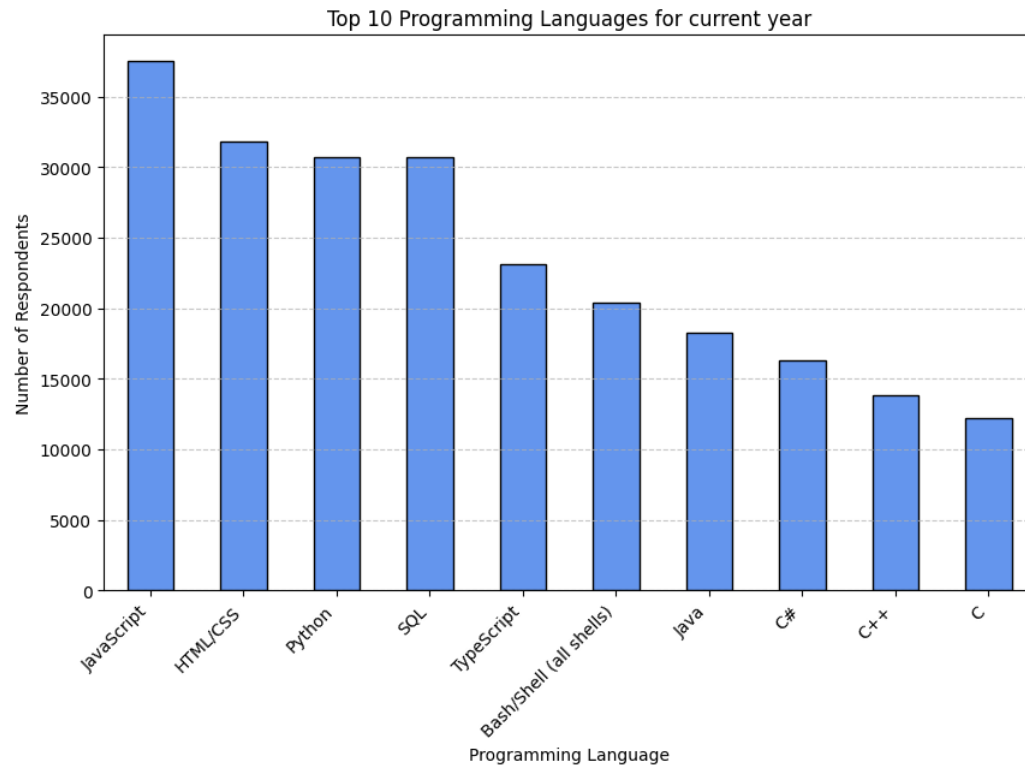

- Key data source is from Stack Overflow Developer Survey.
- Data sources are developer survey, job postings and training portals.
- Data collected through surveys, APIs and web scraping.
- Data wrangling process:
 - Finding and removing duplicates.
 - Finding and handling missing values.
 - Normalizing data.
 - Exploratory data analysis to understand data patterns, characteristics and to remove outliers for better analysis.

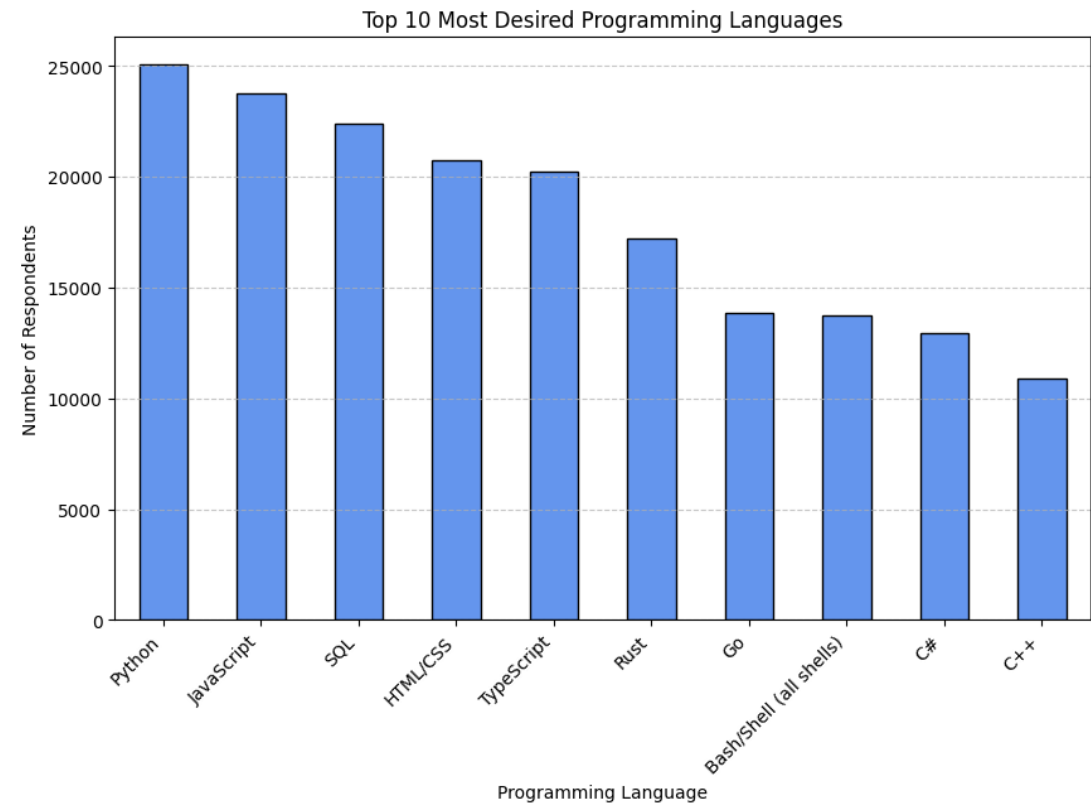

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

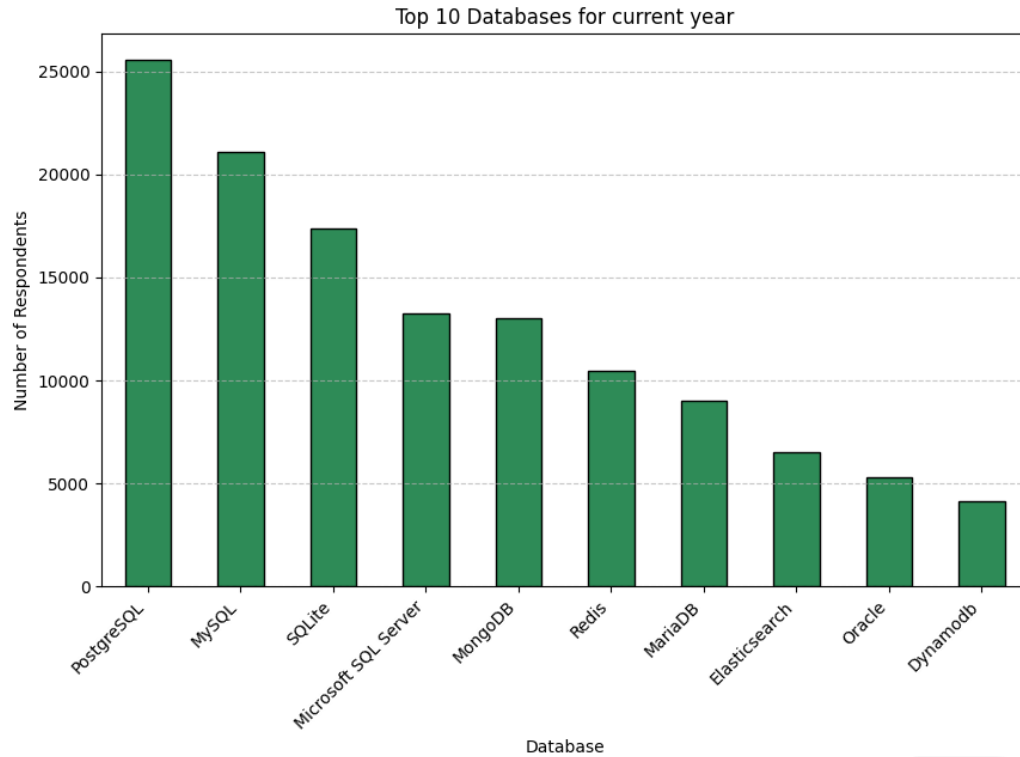

- Top for current year is JavaScript.
- Top for future language to learn is Python.
- JavaScript is the second most desired language.

Implications

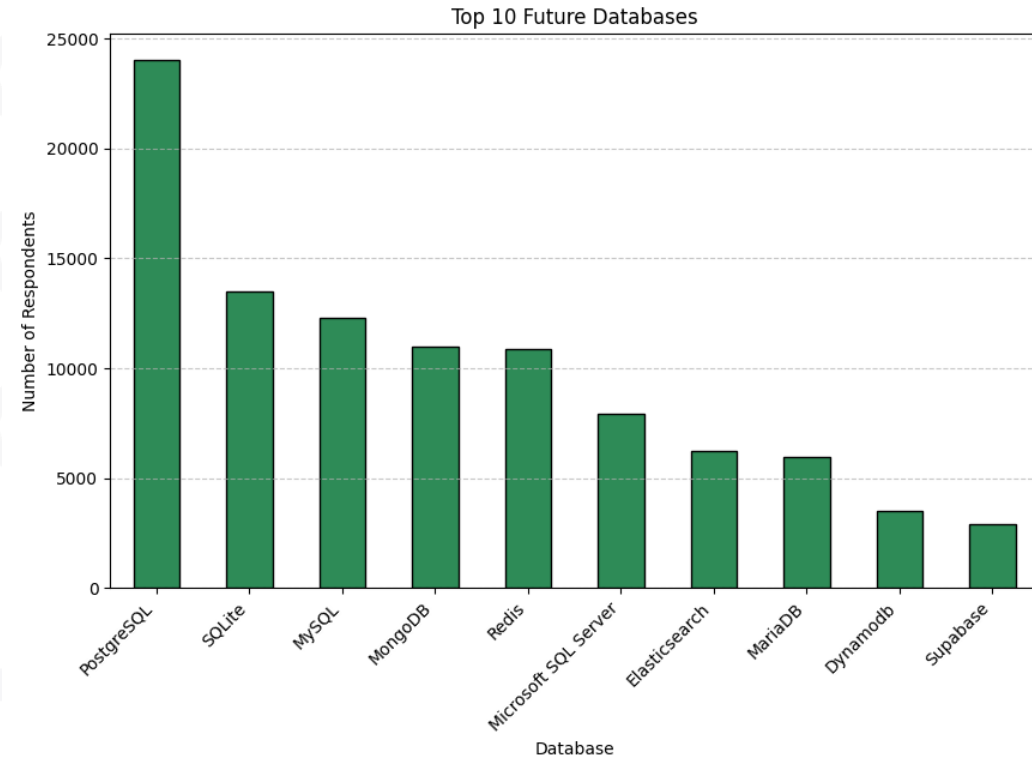

- JavaScript is still relevant for upcoming years.
- Python is the most desired language people want to learn.
- Python is a must learn language next year to keep up with the trend.

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

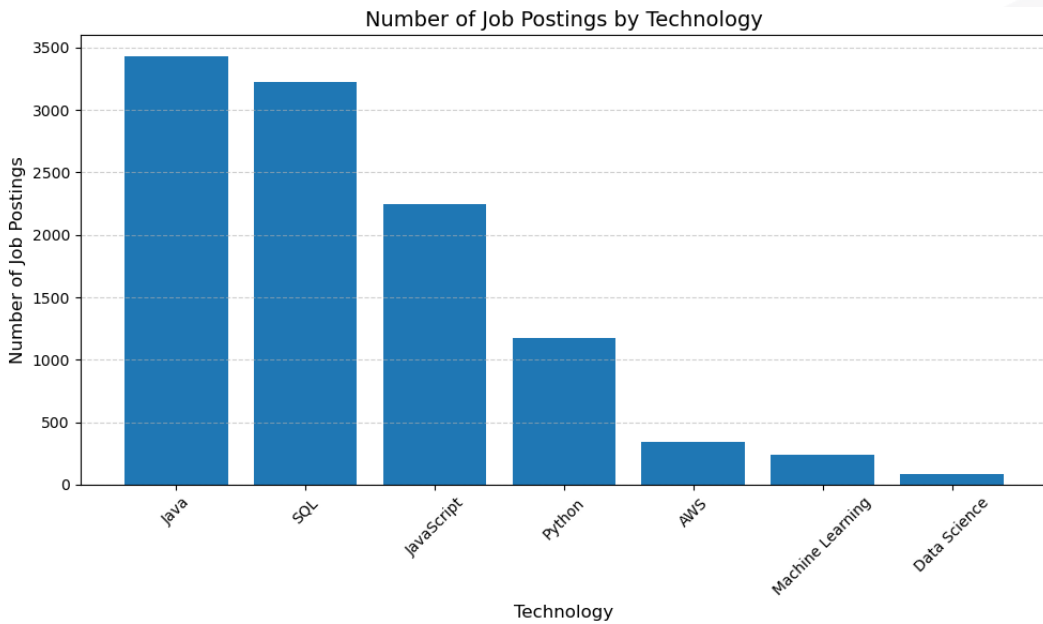

- Top for current year is PostgreSQL.
- Top for upcoming years is PostgreSQL.
- Oracle is in the top 10 for current year databases.

Implications

- Essential to learn PostgreSQL as it is the top for current and upcoming years.
- PostgreSQL will still be relevant for upcoming years.
- Oracle is not relevant for upcoming years as it is not in the top 10 for future databases people want to learn.

JOB POSTINGS

- The graph displays number of job postings by technology.
- The highest number of job postings available by technology is Java.

- The graph displays number of job postings by location.
- The highest number of job postings available by location is Washington DC.

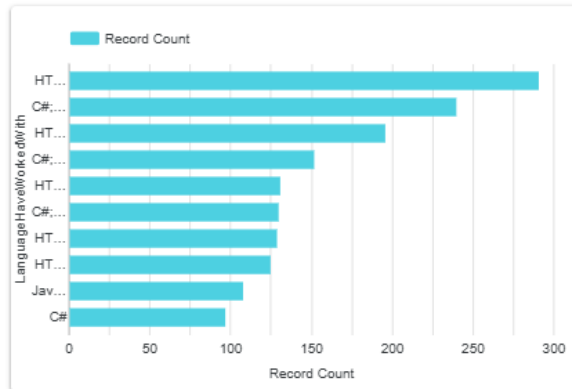

DASHBOARD

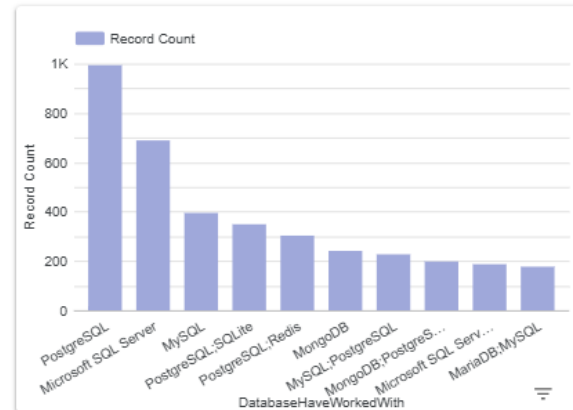

DASHBOARD TAB 1 – CURRENT TECHNOLOGY

CURRENT TECHNOLOGY USAGE

Top 10 Programming Languages

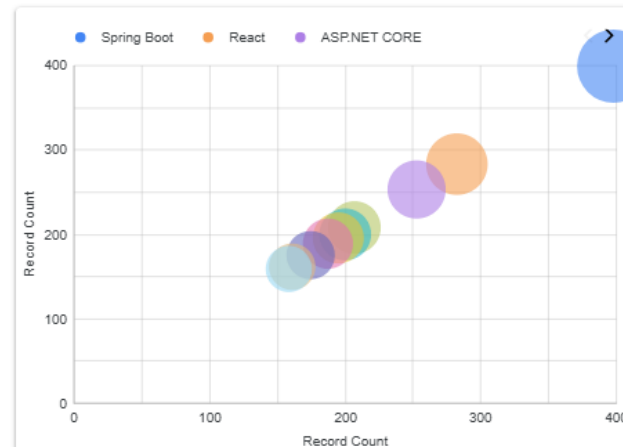

Top 10 Databases Used

Top 10 Platform Used

Top 10 WebFrame Used

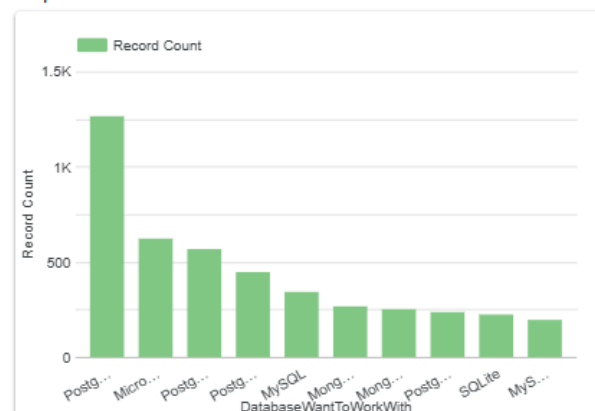

DASHBOARD TAB 2 – FUTURE TECHNOLOGY

FUTURE TECHNOLOGY TRENDS

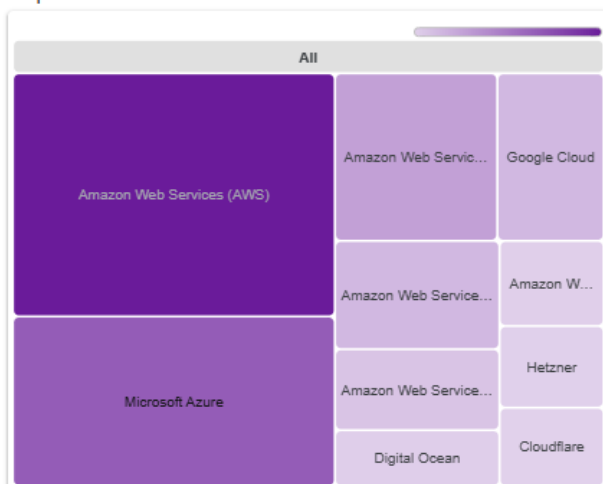

Top 10 Desired Programming Languages

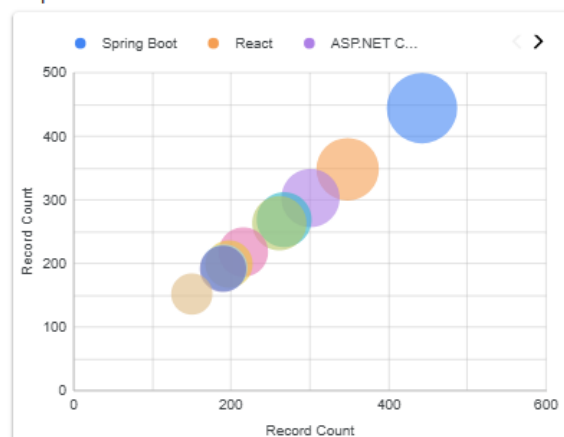

Top 10 Desired Databases

Top 10 Desired Platforms

Top 10 Desired Frameworks

DASHBOARD TAB 3 - DEMOGRAPHICS

DEMOGRAPHICS TRENDS

Respondent Age Group Count

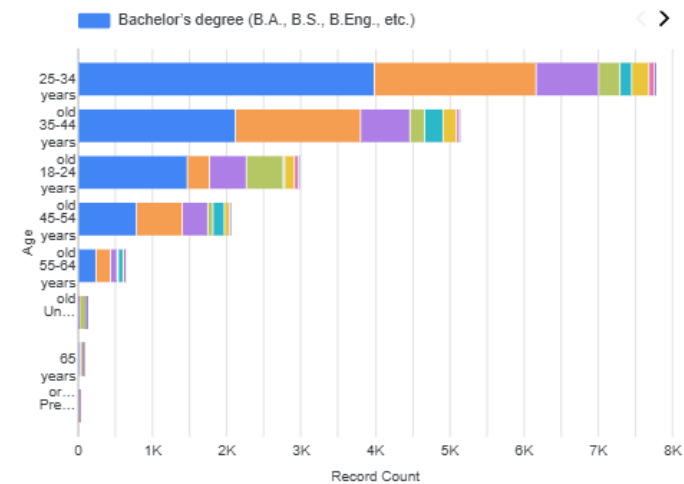

Respondent Count by Country

Respondent Education Level

Respondent Count by Age, Classified by Education Level

DISCUSSION

- **Current Technology Tab**

- Top Language is JavaScript
- Top Database is PostgreSQL
- Top Platform is Microsoft Azure
- Top Webframe is Spring Boot

- **Future Technology Tab**

- Top Language is Python
- Top Database is PostgreSQL
- Top Platform is Amazon Web Services (AWS)
- Top Webframe is Spring Boot

- **Demographics Tab**

- Majority of the survey participants is around 25-34 years old.
- Most of the participants are from United States of America.
- Most of them has a bachelors degree.

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript is popular now and will maintain its popularity in upcoming years.
- Python is the most desired programming language and might surpass JavaScript at some point.
- PostgreSQL is the top database now and will maintain its standing in upcoming year.

Implications

- Learning JavaScript, Python and PostgreSQL will definitely build a solid portfolio for an individual.
- Client can hire individuals with the mentioned skillset in order to keep up with the emerging technology trends.
- Based on the findings, client can start to adapt with the technology trends for better adaptability and to build a stable community within the company.

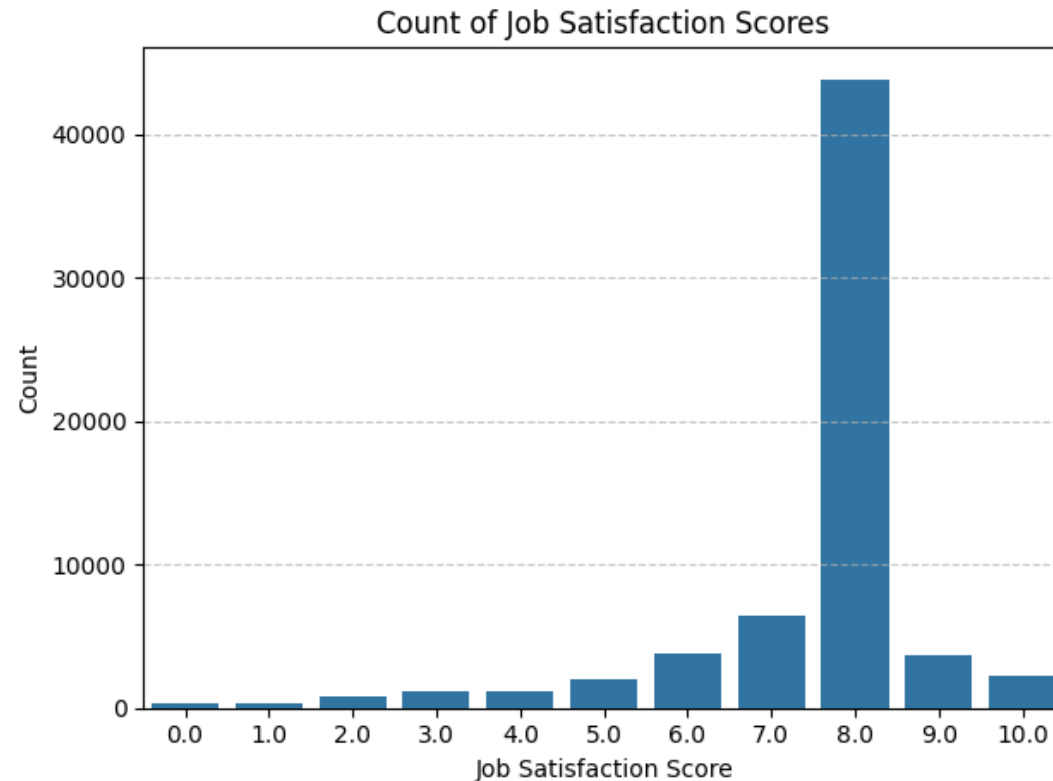

CONCLUSION

- The technology trends definitely highlighted that JavaScript, Python and PostgreSQL surely dominates the technology landscape.
- Reflects both current industry demands and future learning priorities.
- Client need to adapt hiring, training, and workforce strategies to align with evolving market demands.
- Client can build a skilled, adaptable workforce ready to thrive in the future technology landscape with the insights.

APPENDIX

- The graph displays the count of job satisfaction scores.
- Majority of the participants are satisfied with their jobs.

POPULAR LANGUAGES

- The graph displays the average annual salary in USD against the programming language.
- The highly paid language on average is Swift
